SPECIALIST &
STRATEGIC PARTNER
TO LEADING

Defence & Commercial Aviation.

INTRODUCTION

Aeroguard Solutions Pte Ltd, incorporated in Singapore, is a specialist and strategic partner to leading defence and commercial aviation organization for aircraft maintenance, repair and overhaul (MRO). We can take care of your complete requirement for rotables and consumables, and with our short-turnaround time and competitive sourcing, you have in us an ideal one-stop trusted and long-term supply chain partner.

We are managed by trade professionals with deep knowledge of the industry on the supply and demand side, and with a good network of support and service partners across the globe.

Our team works in concert with original equipment manufacturers, reputed repair and maintenance workshops, and credible after-market spare parts suppliers, to ensure the airworthiness of military and commercial aircrafts. With our experience and strategic partnerships, we can act as a single source for spare parts, routine maintenance and overhaul maintenance for a wide range of American, Russian, French and British military aircrafts and rotorcrafts.

One-stop trusted &
long-term supply
chain partner.

WHAT WE DO

SPARES AND SUPPLIES

Aeroguard is an ideal partner for procurement of components, spares, machines, assemblies and consumables for military and commercial aircrafts of fixed-wing and rotary-wings. We have a well-oiled and updated network for sourcing hard-to-find spares and components, even some that are not listed on the ILS and other sourcing tools.

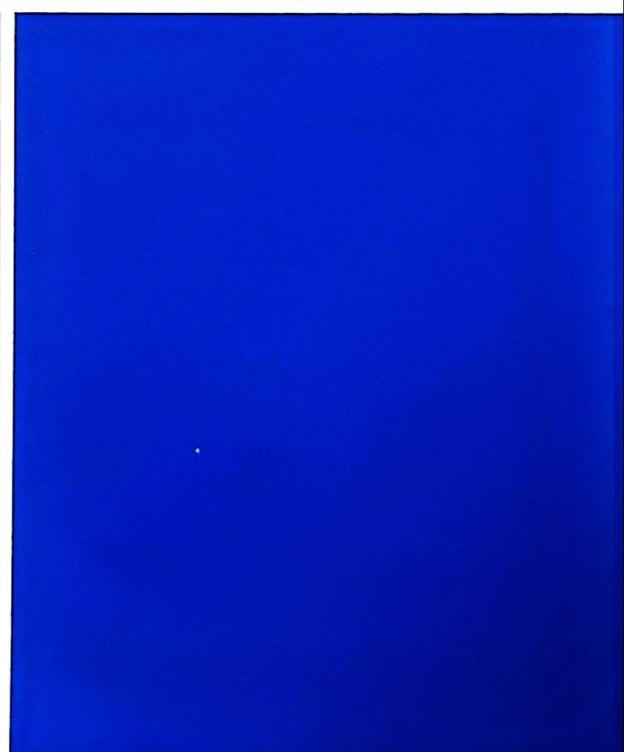

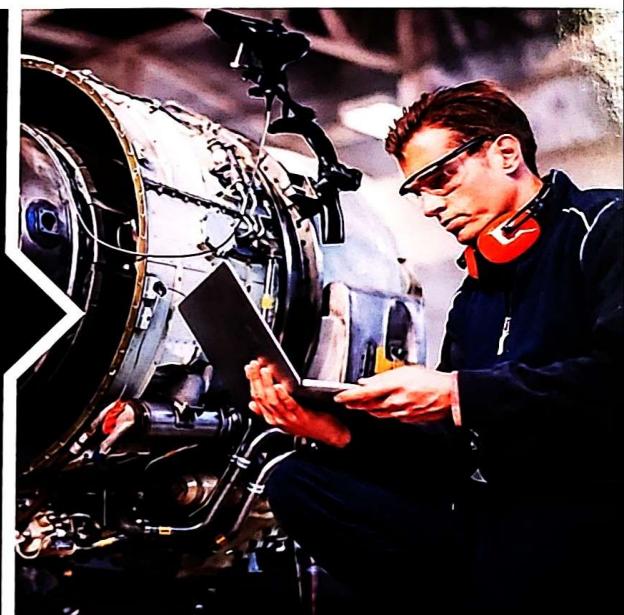

We offer certified overhauled and repaired units to keep your costs low. Our new units come with OEM certification. We can also provide you with OEM replacement parts.

We are a reliable source for ground support equipment as well as tooling equipment from a host of reputed

manufacturers. We can procure for you on ad-hoc or contractual basis a regular supply of your consumables. Rely on us for your chemical supplies as well.

You can rely on our competence to source from OEMs, airlines, workshops and exchange pools. We are proactively scouring the supply markets to maintain a relevant and accurate database of parts inventory across the globe.

Our mission is to provide specialist support and sincere services to ensure the airworthiness of aircrafts serving defence and commercial purposes.

WHAT WE OFFER

OUR SERVICES

Aeroguard understand the importance and critical nature of aircraft maintenance in the military and commercial sphere and our services are structured to serve your needs. Our scope of services extends the full spectrum of MRO activities and through our extensive worldwide network of engineering workshops, and OEM partners we can ensure a short turnaround time. We offer repair service from accredited FAA/EASA and OEM approved MRO shops.

Preventative Maintenance

Overhaul Management

Aircraft On Ground

We are fast in providing estimates and answers helping our customers take informed decisions. Years of experience has helped us master the coordination of the movement of machines and assemblies. We keep our customers regularly updated on delivery times, which further helps them in planning their operations.

We lend our expertise in aircraft maintenance, compliance standards, management practices to help you plan and execute preventive and breakdown maintenance of your military fleet.

You can greatly benefit from expertise and our global relationships to keep your costs low and turnaround fast.

Special Products

Fast Response

We are quick to respond to your needs right from our first response for availability and estimate. Our understanding of the nature and urgency of your requirement keeps us on our toes to ensure a short turnaround time.

Competitive Pricing

We excel in sourcing genuine spares at competitive pricing. Our reach help us identify quickly the availability of the part, and with our volume of business we can negotiate a better price. Long term relationships also help in getting good process.

Wide Scope

We strive to be the one-stop source for all your requirements. A constantly updated database allows to quickly locate the part you need. Our network is extensive to supply whatever you need in rotables and consumables.

Our success and preferred status in the industry is on the axis of three key factors in the realm of maintenance, repairs and overhaul.
