

ABOUT OUR COMPANY

Aeroguard 360 Services, is a specialist and strategic partner to leading defence and commercial aviation organization for aircraft maintenance, repair and overhaul (MRO).

Our goal is to provide the widest selection Of quality aviation products on time at economical pricing. We can take care of your complete requirement for rotables and consumables, and with our short-turnaround time and competitive sourcing, you have in us an ideal one-stop trusted and long-term supply chain partner.

**Your Trusted
Partner in
Aircraft
Maintenance**

MAKING MORE POSSIBLE THROUGH
PREVENTIVE MAINTENANCE AND ACCESS TO
HARD-TO-FIND COMPONENTS.

What We Do?

Spares and Supplies:

Aeroguard serves as your reliable partner for sourcing spare parts, machinery, and consumables for commercial fixed-wing and rotary aircraft.

Certified and Cost Effective:

We offer cost-efficient solutions featuring certified overhauled and repaired units.

Aircraft Support:

Our goal is to deliver expert support and reliable services to ensure the continued airworthiness of both defense and commercial aircraft.

Why Choose Us?

Fast Response:

We prioritize prompt responses to your needs, beginning with the initial inquiry regarding availability and estimates.

Competitive Pricing:

We specialize in procuring authentic spare parts at highly competitive prices..

Wide Scope:

We aim to be your comprehensive solution for all aviation requirements. Our continuously updated database enables us to quickly locate the parts you need.

Our Services

01

Preventative Maintenance:
Our solutions are designed to uphold your aircraft's operational readiness and extend its service life

02

Overhaul Management:
Comprehensive solutions for restoring your aircraft's components to peak performance

03

Aircraft On Ground:
Our AOG services provide speed and reliability ensuring that critical parts and services reach you in the shortest possible time

01 Preventative Maintenance

Our Preventative Maintenance services are designed to minimize downtime and enhance aircraft reliability. Through our expertise in regulatory compliance and global network of OEM partners, we ensure all routine inspections, component replacements, and performance evaluations are completed efficiently, keeping your fleet operational. Preventative Maintenance ensures the continuous airworthiness and reliability of your fleet.

02 Overhaul Management

We offer comprehensive Overhaul Management services, restoring critical aircraft components to optimal performance. Utilizing OEM-approved facilities and certified workshops, our approach ensures cost efficiency, compliance with international standards, and minimal operational disruptions. We take a structured approach to overhauls, ensuring every component is meticulously disassembled, inspected, repaired, and reassembled to OEM specifications.

03 Aircraft On Ground

Our Aircraft on Ground (AOG) services prioritize speed and reliability, ensuring that critical parts and services reach you in the shortest possible time. With a robust supply chain and 24/7 customer support, we help you minimize downtime and keep operations running.

01 Preventative Maintenance

Our Preventative Maintenance services are meticulously designed to uphold the highest standards of safety and efficiency in aviation operations. By conducting regular inspections and proactive maintenance, we identify potential issues before they escalate, thereby reducing the risk of unexpected failures and costly repairs.

Our team of certified technicians utilizes advanced diagnostic tools and follows stringent protocols to ensure each aircraft component functions optimally. We also maintain detailed maintenance records, facilitating seamless regulatory compliance and providing clients with transparent service histories.

Routine Inspections:

Comprehensive checks covering airframe, avionics, and engine systems.

Component Replacement:

Proactive replacement of wear-prone parts.

Performance Testing:

Advanced testing to ensure optimal functionality.

Key Benefits

Enhanced safety and operational readiness.

Regular inspections and maintenance activities ensure all components are functioning optimally, significantly improving overall safety and reliability of the aircraft.

Reduction in unexpected breakdowns and repairs.

Proactive replacement of wear-prone parts and early detection of issues minimize the risk of unexpected failures, reducing operational disruptions.

Improved regulatory compliance and cost-efficiency.

Strict adherence to aviation regulations and efficient maintenance processes help maintain compliance while optimizing costs, ensuring long-term operational savings.

02 Overhaul Management

Our Overhaul Management services encompass a comprehensive approach to restoring aircraft components to their original performance standards. We manage the entire overhaul process, from initial assessment and disassembly to cleaning, inspection, repair, reassembly, and rigorous testing.

By adhering to OEM guidelines and utilizing state-of-the-art facilities, we ensure that each component meets or exceeds industry standards. Our strategic partnerships with certified workshops and suppliers enable us to offer cost-effective solutions without compromising on quality or safety.

- ✓ **Comprehensive Overhaul Process:** Includes inspection, disassembly, cleaning, replacement, reassembly, and rigorous testing.
- ✓ **Certified Standards:** All overhauls comply with OEM, FAA, and EASA standards, ensuring your aircraft components meet stringent aviation requirements.
- ✓ **Global Network of Workshops:** Partnerships with certified repair stations for streamlined service delivery.
- ✓ **Advanced Testing Facilities:** Utilizes cutting-edge diagnostics and testing technologies for precise evaluations.
- ✓ **Diverse Component Expertise:** Covers landing gear, hydraulic systems, avionics, pneumatic systems, and more.

Key Benefits

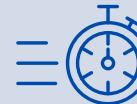

Enhanced Reliability

Restores critical components to peak performance, reducing failure risks.

Cost Efficiency

Offers certified overhauled components at competitive pricing, minimizing long-term maintenance costs.

Shorter Turnaround Time

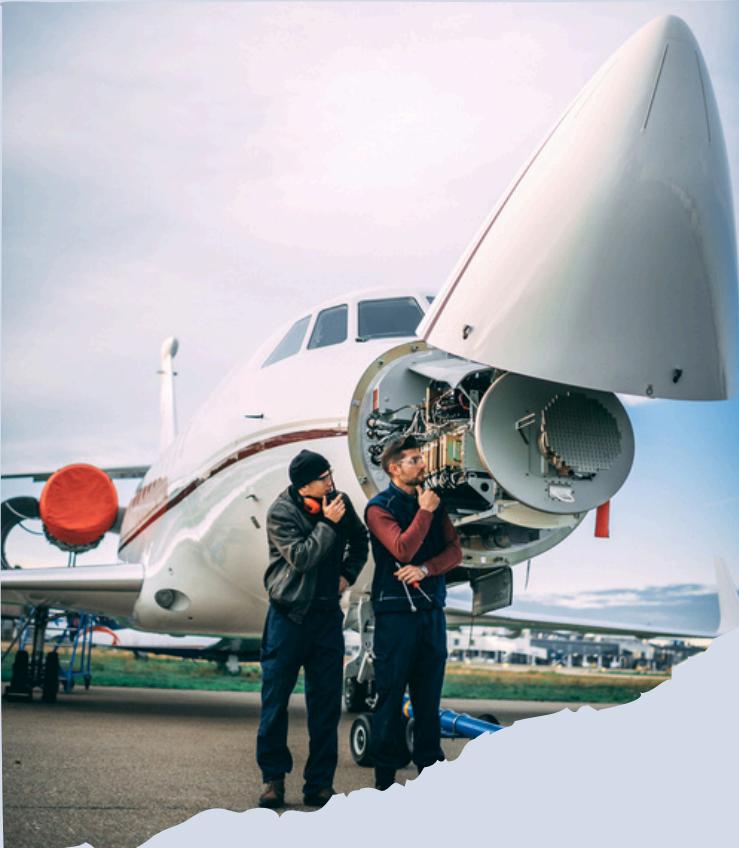

Leverages strategic partnerships to ensure fast completion of overhauls, reducing downtime.

Regulatory Compliance

Guarantees that all overhauled components meet international aviation standards.

03 Aircraft On Ground

In critical AOG situations, our dedicated team is available 24/7 to provide immediate assistance. We understand that time is of the essence, and our rapid response protocol ensures that expert technicians are dispatched promptly to your location. Leveraging a global network of suppliers and logistics partners, we expedite the sourcing and delivery of necessary parts and equipment.

Our goal is to minimize aircraft downtime, ensuring a swift return to service while maintaining the highest safety standards.

Rapid Response for AOG Situations:

Aeroguard emphasizes quick responses to urgent needs, ensuring minimal delays in restoring grounded aircraft. Their understanding of the urgency behind AOG cases drives their commitment to swift resolutions.

Global Sourcing Capability:

Aeroguard leverages a well-established network of OEMs, workshops, and suppliers across the globe to locate and deliver critical spare parts for commercial aircrafts.

Reliable Communication and Updates:

The team provides regular updates on delivery times and progress, enabling clients to make informed decisions and plan operations effectively.

Expert Coordination and Logistics:

Aeroguard's expertise in managing the movement of machinery and assemblies ensures efficient handling of components required to resolve AOG scenarios.

Key Benefits

Faster Operational Recovery

The company's focus on quick response times and reliable delivery ensures grounded aircraft are returned to service as soon as possible.

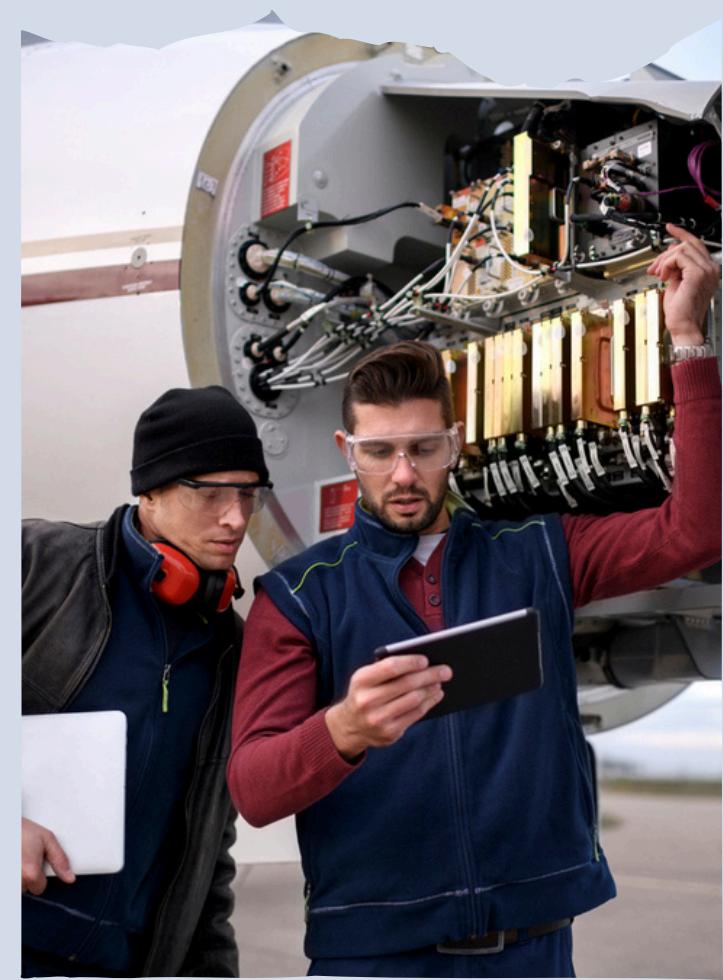

Trusted Partner for Critical Needs

With a global network and deep industry expertise, Aeroguard serves as a dependable partner for resolving emergencies efficiently.

Seamless Operations

Frequent updates on delivery timelines allow clients to streamline planning and operations, reducing downtime and financial impact.

Products

At Aeroguard, we take pride in offering a comprehensive portfolio of high-quality aviation products tailored to meet the diverse needs of commercial fleets. Our product range includes OEM-certified spare parts, machinery, assemblies, and consumables, ensuring that your aircraft remains operational and compliant with industry standards.

We offer an extensive inventory of aviation products, including OEM-certified spare parts, consumables, and specialized equipment. Our catalog encompasses a wide range of components, from avionics and landing gear to cabin interiors and engine parts. We have a well-oiled and updated network for sourcing hard-to-find spares and components, even some that are not listed on the ILS and other sourcing tools.

We pride ourselves on our ability to source even the most hard-to-find items, ensuring that our clients have access to the parts they need to maintain optimal aircraft performance. All products are accompanied by the necessary certifications and warranties, providing assurance of their quality and authenticity.

Extensive Sourcing Network: Leveraging a robust global network, we specialize in acquiring even the most challenging-to-find or obsolete components, ensuring operational continuity for our clients.

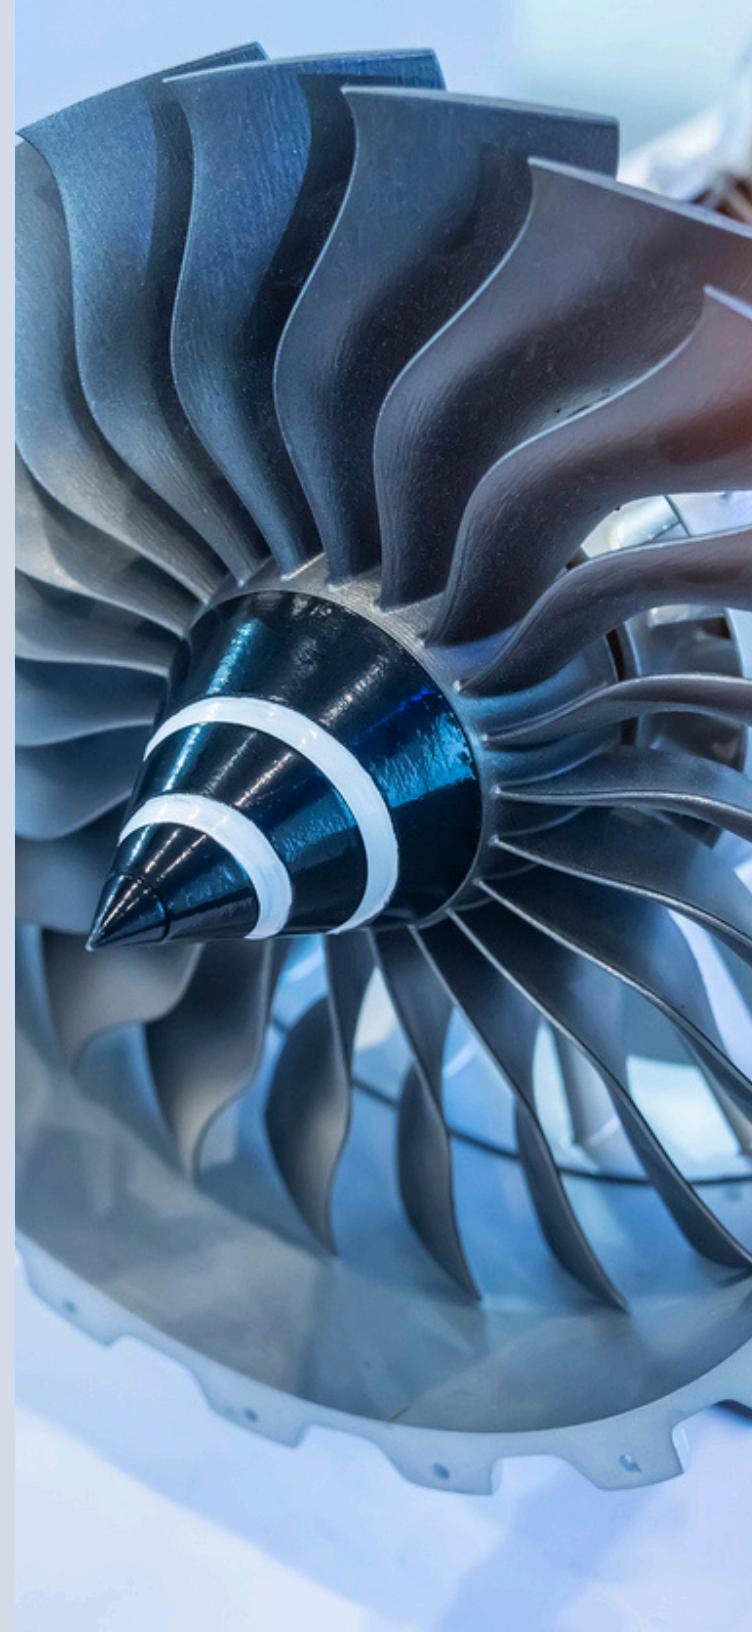

Diverse Product Portfolio: From avionics to hydraulic systems, we supply a wide array of components designed for fixed-wing and rotary-wing aircraft.

Certified and Reliable Solutions: All our products, including new, overhauled, and repaired units, come with OEM certification, guaranteeing quality, safety, and reliability.

Commitment to Excellence: Our mission is to ensure seamless operations by providing reliable products and solutions that enhance aircraft performance, reduce downtime, and deliver cost-effective results. With Aeroguard, you gain a trusted partner committed to the airworthiness of your fleet.

Capabilities

Our capabilities include a full spectrum of aviation services, from routine maintenance to complex system repairs. Leveraging our partnerships with OEMs and certified workshops, we ensure precision, reliability, and adherence to aviation standards.

Our comprehensive suite of aviation services is designed to meet the diverse needs of our clients. From routine maintenance and repair operations (MRO) to specialized services such as avionics upgrades and structural modifications, we possess the expertise and resources to handle a wide array of aviation requirements.

Our team of seasoned professionals is committed to delivering solutions that enhance aircraft performance, ensure regulatory compliance, and extend operational lifespan. We continuously invest in training and technology to stay at the forefront of industry advancements, ensuring that we provide our clients with the most effective and efficient services available.

Routine Maintenance:
Scheduled inspections and performance assessments.

Repair Operations:
On-demand repairs with quick turnaround times.
